DETAILED ACTION

1. Claims 1-16 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Applicant's invention claims a power converter system advantageously employs a modular, bidirectional symmetrical power converter assembly in a readily customizable configuration to interconnected a direct current power source to three-phase alternating power grid. A power converter system comprises first and second converters each comprising a plurality of active, commonly gated switches and associated passive unidirectional current devices, wherein the first converter comprises a three phase input, the second converter comprises three phase output and each converter capable of selective, three phase passive and active rectification/inversion; a direct current bus electrically interconnecting the first and second converters; an interface to electrically connect the direct current output device to the first converter; control means, operatively connected to the converter switches, for operating first converter as a passive unidirectional current blocking element and for operating the second converter as an active inverter; a three phase isolation transformer comprising primary and secondary sides, wherein the primary is electrically connected to the second converter; and a three phase controllable switch, operatively connected to the control means, for selectively connecting and disconnecting the power converter system from the power grid, current from the direct current output device excites the isolation transformer when the

controllable switches open so that the isolation transformer does not draw current from the power grid, none of the cited art overcome the limitation of the instant application, since claims are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
